Although this is an inactive game, which allows you to progress through the game without much interaction, there are many things to do while you wait so that it never gets boring. Originally conceived as a kind of add-on for Fortnite, Battle Royale exploded in a way that no one expected, quickly becoming one of the best free games 2020 has to offer. Fortnite Battle Royale is entirely based on a simple scenario: you fell into a card with 99 other players in a free scrum for all, and the last one standing at the end wins. Because of its meteoric success, Epic Games is working hard to regularly integrate new game modes and features. Take Playground mode, for example - it drops you into the map and allows you to build up structures for a while before the floodgates open and the carnage begins. What's especially cool is that with Fortnite, you can actually play with your friends, no matter what platform they're on. Whether you're on PC, Xbox One, iOS, Android or PS4, you'll be able to match millions of other players from all these different platforms. Play Fortnite Battle Royale 2 for free. Everquest's future was briefly questioned after the sale of Sony's online entertainment division in February 2015, but Everquest is back with a backdri, swaggering with new expansion packs and continued support by Daybreak Game Company. This is one of the many reasons why it made our best list of free games 2020. The first of its kind to succeed commercially with a 3D 3D game Everquest was released in 1999 as MMORPG (massively multiplayer online role-playing game) and has since been documented as one of the most important games in the history of the medium. With regularly released expansion packs (quite massive in scale, at least from the start) with vast new domains, races and classes, Everquest brings to the table just about anything you might want or need an MMO. Moreover, it is much better in cooperative management than its alternatives. Despite the overhaul, it's certainly not the brightest MMO in the world, but hanging on to so many players shows that it's doing something right. The big change introduced in Runescape 3 that made it appear much more updated was the ability to see much further. In Runescape 2, the horizon quickly gives way to fog... Not now. Maplestory's lighter tone and customization make it feel more like Harvest Moon than World of Warcraft or Rift.
